Horizons Unlimited: A Statistical Report on Participant Training.
Agency for International Development, Washington, D.C.
Pub Date 67
Note-192p.; 10th annual edition.
EDRS Price MF-$0.75 HC-$9.70
Descriptors-Contracts, *Developing Nations, Educational Objectives, *Financial Support, Followup Studies, Foreign Students, *International Programs, Orientation, Program Costs, Program Evaluation, Program Length, Selection, Seminars, *Statistical Data, Technical Assistance, *Technical Education
Identifiers-Agency for International Development

The annual report gives data on the United States contribution through the Agency for International Development (AID) toward the training of persons from the less developed countries, in the U.S. or a third country. Included is background information on AID-sponsored training as regards: (1) relationship to program goals (2) cost sharing: (3) criteria for selection of trainees: (4) duration of training: (5) types of training (non-degree and degree): (6) determination of where to train (restrictions on training outside lesser developed country, local training, third country training, training in the U.S.): (7) orientation: (8) seminars: (9) counseling: (10) evaluation. Data showing total participant arrivals (for FY 1944 through FY 1967) under non-contract and contract programs, in the U.S. and third countries, are in Section 1: Section 2 is an expansion of the statistics of the first section to include detailed descriptions of the training programs, the number of new participants, and their sex and marital status. Sections three through six present: FY 1967 in-training statistics, FY 1967 departure statistics, AID followup program, and data by country. (nl)

Acknowledgements

This edition of the *Report on Participant Training – HORIZONS UNLIMITED,* was prepared under the direction of James C. Johnson, Chief, Administrative Division, and Robert D. Brandt, Chief, Statistical Control Branch. Helen B. Maddox, Reports Section, Statistical Control Branch, was responsible for general supervision, planning of content, and review. Julia Harrison, in charge of coding operations, edited the input data from which the statistics are compiled.

The cooperation of Valter V. Monroe, former Chief of the Statistical Control Branch, Robert Clark, formerly Management Analyst, Management Planning, and Robert B. Perdew, Systems Analyst, Management Planning, is gratefully acknowledged since the new information included in this edition is due to their development of the 1967 management information system.

Copies of this edition are available upon request to.

NOVEMBER 1968

To The Reader:

The training of foreign nationals (participants) in the U. S. and third countries is an important part of the U.S. technical assistance program for human resource development in the less developed free nations of the world. Under AID, or predecessor sponsorship, over 100,000 participants have been trained in the U.S., and thousands of others have received training in other countries.

Participant training is directed toward the attainment of U.S. and cooperating country mutual objectives to improve the country's economy and the health, education and welfare of its people. Though primarily a technical assistance effort to promote and transfer modern technologies and skills, this program also has a nontechnical character that strongly influences mutual cooperation. Many participants assume new roles and exercise of leadership in their country's development upon their return home.

With AID as the intermediary, thousands of institutions and facilities in all parts of this country have provided substantial input and investment into this human capital. The AID training program has become a strong resource for the development of agents of progressive change.

The statistics in this report provide a numerical insight into what has been accomplished. It should afford missions a basis for comparison of what has been done with that which is planned and also a basis for evaluation of planned objectives. At best, however, the statistics are no more than an indication and starting point for in-depth studies required to determine the impact of the continuing return of human capital on the progress of the particular country. Given the increasing financial constraints on the AID program, we can no longer continue training across so broad a spectrum as in the past; rather, we must concentrate all efforts on those programs which will bring the greatest benefits to the development goals for each country. We must identify and eliminate less productive training programs to use available resources more efficiently.

The Office of International Training is pleased to have attained an important role in the economic and social progress of the less developed countries. Assisted and encouraged by AID, most of this progress has come through the country's own institutions and through the investment of their own human capital. We look forward to continued success and progress for all.

D. C. Lavergne

INTRODUCTION

The *Report on Participant Training – HORIZONS UNLIMITED*, published annually since 1958, is a summary of statistics on the United States Contribution toward training of foreign nationals from lesser developed countries of the world, and is designed to serve as a statistical reference on major elements of the international training program.

I. SOURCE OF INFORMATION

The data describing the major categories of training are gathered from varied sources:

1. U.S. Non-Contract Programs – Source documents furnished by AID/Washington Program Development Officers and Project Implementation Order/Participants (PIO/P) furnished by U.S. AID missions. Additional information is provided by organizations offering language training, pre-university experience, and communications seminars.
2. U. S. Contract Programs – Statistics are based on reports prepared and forwarded to AID/W by contractors.
3. Third Country Programs – Statistics are based on reports prepared and forwarded to AID/W by U.S. AID missions in the country of training.
4. Secondary Programming – Statistics are based on reports prepared and forwarded to AID/W by other government agencies providing such training to AID participants.
5. United Nations Fellows Programs – Statistics are based on reports prepared and forwarded to AID/W by agencies providing training to the Fellows.

II. CHANGES IN THE 1967 EDITION

Statistics on fiscal year arrivals (beginning with 1944) have been consolidated, by category, in this edition (Section I). In addition to data on the current year's arrivals (Section II), tables showing participants in training during the current year (Section III) and data on programs completed during the current year (Section IV) have been included. Section V provides information on the AID follow-up programs, and Section VI presents information by each country of origin participating in the AID training program during the current fiscal year. For easy reference, the contents of the Section VI are arranged alphabetically by area of origin, by country.

III. BACKGROUND INFORMATION ON AID-SPONSORED TRAINING OF FOREIGN NATIONALS

A. RELATIONSHIP TO PROGRAM GOALS

All A.I.D.-sponsored training is directed towards the achievement of U.S. and host country development program goals and is an integral part of the approved program jointly agreed to by the U.S. and the cooperating country.

Training of participants is usually one component of a development project, but on occasion, may be the sole element of a project. The Mission and the cooperating country, in analyzing that nation's requirements for social and economic development, will assess the need for current and future human resource requirements in the approved programs–the priority of needs, the current skills and knowledge available, and the training required to meet those needs. The kind of analysis made in determining whom to train is dependent on whether or not a manpower survey has been made of the segment of the economy under consideration, the usability of that survey, and whether it contains the kind of detail necessary to make qualitative judgments. If such tools are not available, then plans may be made for making an analysis for use in future years. Additionally, joint pragmatic decisions must be reached for proceeding, and priorities among competing fields must be set that will meet identifiable long-range and short-range goals.

The pertinent technical offices of the U.S. Mission and the cooperating country together develop the scope and determine the time required to complete the planned training as well as the number of individuals to be trained. The desired area of training, its estimated cost, and the requirements of the training component are then clearly defined in a Project Implementation Order/Participants (PIO/P) form and this is agreed to and signed by representatives of both the U.S. and Lesser Developed Country (LDC) governments. The PIO/P document thus contains all basic information needed by those persons who will develop a training program for an individual trainee or trainees.

B. COST SHARING

The Cooperating Country Government is expected to pay a pre-negotiated "fair share" of the cost of every A.I.D. training project. This may be for international travel, support of dependents, continuance of all or part of the salary of the participant during his absence.

C. SELECTION OF A.I.D. PARTICIPANTS (TRAINEES)

1. Qualifications, Candidates, Objectives

After the training element of the project has been developed, qualification standards are established to screen participants. These candidates are obtained in various ways. They may be nominated by USAID Technicians or by the Host Government and the persons so nominated may come either from the public or the private sector. The U.S. Mission Technical Advisor, Training Officer and Host Government will then jointly screen the candidates for selection. In designating participants, every effort is made to assure that the persons selected will contribute to the program goals and selection is not on the basis of an award or grant to an individual. Each individual training program, consequently, is tailored to the manpower needs of the project to which it is related. An individual's personal ambitions are considered only to the extent that they are compatible with the jointly agreed upon program objectives, e.g., obtaining an academic degree. Also the proposed training element of the project is reviewed with the U.N. Representative to assure a minimum of duplication of training effort.

2. Participant Bio-Data Form

A "Bio-Data Form" details a participant's history including date of birth, education, language knowledge, previous jobs, whether the participant has ever studied abroad before, and if so, under whose auspices. Participants to be trained in the United States are given an English language proficiency test and this score is also recorded on the participant's Bio-Data form. At the conclusion of the Bio-Data form the participant agrees to:

> "follow diligently the program arranged as requested by my government and will not seek extension of the period of my program. I further agree that upon completion of my training, I will return to my country without delay and will endeavor to utilize, for the benefit of my country, the training acquired under this program."

3. Other Required Forms

The participant also signs a separate "Conditions of Training Form" covering dependents, operation of automobiles, degree training, attendance at conferences, and termination of program before normal conclusion. He must also pass a medical exam, including chest X-ray, prior to departure. This medical report and X-ray are hand-carried by the participants to the U.S.

The PIO/P containing the training program's objectives, the Bio-Data, Conditions of Training, etc., are forwarded to the country of training at least 10 days prior to the participant's departure.

D. DURATION OF TRAINING

The normal minimum training period is two months, except for some team observational training programs, whereas the maximum period may be more than a year.

E. TYPES OF TRAINING

A.I.D. does not follow any one training method or procedure. It provides:

1. Non-Degree Training

Some programs can best be achieved through planned observation particularly for experienced technical persons, who do not need long training programs. These "observation" programs either by individuals or in teams may include visits to industrial plants, banks, farms, labor unions, businesses, governmental agencies, universities, and other organizations. They may stay for an hour or two or several days at any one of these places. Other programs may include specially planned seminars, background study in a university, field observation, or "on-the-job" training within a government or private facility. For short-term observation type training, interpreters may be used with a team. For longer term training, the participant must possess an English Language proficiency sufficient for the level of his program.

2. Degree Training

Academic study leading to a degree outside the home country is normally not provided in those fields of activity where adequate training is available in the cooperating country. Degree training per se is not approved, unless it is essential to the position for which the participant is being trained. In most cases, two degree training requests are not approved without a period of time back in the home country between degrees. All programs must then be fully justified by the Mission since A.I.D. does not wish to train "repeaters," i.e., persons who have already received extensive training outside the cooperating country, irrespective of under whose auspices the training was given. Standard courses are usually followed by participants trained in academic institutions, unless the institution believes more preparation is required. When additional training is necessary, courses may be added, or the participant may "audit" courses instead of taking them for "credit." Degree students, however, are expected to meet established school standards. Payments to training institutions are made on the basis of formal, but flexible agreement. For all trainees attending whatever institutions, an A.I.D. Program Development Officer (PDO) monitors all aspects of the training.

All academic participants are required to file an "Initial Training Report" with their Program Development Officer within one week after arriving at a training

institution. This report lists the courses being taken, whether they are for "audit" or "credit," the name of the department advisor, etc. All participants report quarterly thereafter on their progress and difficulties, including their academic grades for all courses, lists of courses selected for the coming terms that have been approved by their faculty advisor. These are then reproduced by AID/W and sent to the U.S. Mission for whatever distribution the Mission may wish to make within the host country.

Most colleges and universities have foreign student advisors and many have organized programs in which the participants are urged to participate. Changes in the participant's program (including extensions) may result from his request if agreed to by the home country and U.S. Mission.

F. DETERMINATION OF WHERE TO TRAIN

1. Restrictions on Training Outside LDC

A.I.D. regulations (M.O. 1381.1, paragraphs 3 and 4) do *not* permit U.S. sponsored training outside the Lesser Developed Countries under the following conditions:

a. When local training resources and facilities are available to meet the training requirements, and

b. When other training opportunities are available sponsored by the cooperating government, other governments; other U.S. Government agencies; international organizations; private foundations; or other donors.

2. Local or In-Country Training

"Local" or "in-country" training is not called "participant training." The term "participant training" is reserved for training outside the home country (in the United States or third countries.) Local training is technical training which takes place within the cooperating country for nationals of that country. Statistical data on this aspect of training are not included in this edition.

Local training may be an integral part of A.I.D.'s "Institutional Development Program." In such a case assistance to the cooperating country may take the form of U.S. funding of a contract to give technical advice to a host country organization or institution. Contract technicians would then be sent to host country organizations to assist in setting up training programs. In other instances, the U.S. may fund a "university-to-university" contract between an American university and a host country university, the contract stating the kinds of services to be performed by the American university. This assistance would include advisory services such as curriculum revision, etc. Teachers in the host country institution may be sent to its sister university in the United States under this university contract arrangement.

Local training utilizes local personnel and cooperating country facilities to the greatest extent possible. The training is adapted to meet specific local needs and is normally conducted in the locale where it is to be used. Local training includes:

a. In-service or on-the-job training;

b. Workshops, conferences, and seminars to meet particular needs;

c. Institutional training if local institutions are available or can be developed readily for the purpose. (Wherever possible, personnel used for planning and actual instructional purposes are returned U.S.-sponsored participants.)

3. Third Country Training*

Ordinarily, A.I.D. sponsors third country training programs to countries neighboring on, or within the same region as the requesting country, and only in those countries in which there is an A.I.D. Mission or A.I.D. representative to perform the administrative training arrangements necessary for the management of the program.

A.I.D. does not sponsor training in third countries that are in a "dollar surplus" position with the U.S. This restriction applies to the industralized countries of the world, e.g., Europe, Japan, Australia, New Zealand, etc., but is not applicable to the LDCs'.

Preference is given to third country training in the following situations:

a. Where local currencies are available that may be used to finance training within the country;

b. Where adequate institutions and facilities of the required type are available and particularly where those institutions or facilities have been developed with A.I.D. assistance;

c. For participants at a middle-level of scientific and professional skills and accomplishment, who are at least able to qualify for licenses as skilled workers or craftsmen; or who meet minimum academic requirements for specialized or advanced training in a given trade or profession. (Refresher courses, special workshops, observation tours, academic training, special subject area conferences, and similar in-service training techniques are used to increase the competence and attainments of persons in those categories);

d. Where the Host Third Country has adequate facilities for certain training and can provide this training at a lower cost than the cost of similar training in the United States; and

e. When a particular kind of training is not available or cannot be given as effectively in the United States, because of dissimilarity of climate, local problems,

---

*Third Country Training is training which takes place outside the participant's home country and outside the United States, e.g., Canada, Panama, C.Z., Hawaii, Puerto Rico, Okinawa, or Bermuda.

techniques, language or customs, and training can be effectively given in a third country.

Third country training encourages countries to share more actively in the development of the free world, so that even the lesser developed countries themselves become donors. The requirements for developing and training needed human resources cannot be met by the developed countries or traditional donors alone. Third country training thus encourages each country to share whatever training resources it may have with other countries, who in turn may be encouraged to share their resources, thus broadening the training base of the free world. As third country training develops in a host country that country gradually learns how to administer its training programs and can itself eventually bear much of the administrative activities connected with the running of the program. The country is then prepared to take over the program after U.S. financing and sponsorship cease. Third country training programs are looked on with particular favor by those countries in which the training is given. For example, the Colombo Plan countries have urged that other major donor countries sponsor third country training programs in their countries. (NOTE: In this report since some third country training programs are implemented in two or more host third countries, the number of arrivals for this training will exceed the number of individuals trained.)

4. Training in the United States

When training is not available locally or in a third country, it is given in the United States.

G. ORIENTATION

A.I.D.'s program of orientation includes all participants and is the same regardless of the level of the participant. All participants receive: (a) pre-departure orientation in the home country, and (b) orientation in the country of training whether that be the United States or a third country.

1. Pre-departure Orientation

Four parts are recommended for each orientation program given to a participant before he leaves his home country:

a. An explanation of the development program promoted by his own country and the USA and his own role in that development;

b. A review of his own culture by a host country official or university professor and selected returned participants;

c. A brief review of American culture to reduce potential cultural shock;

d. A review of his tentative technical training program and itinerary and various administrative details, such as passports, visas, advance maintenance allowance and travel arrangements. (If he expresses dissatisfaction with the tentative program, issues should be clarified at this time to avoid later misunderstanding. Suggestions arising from these discussions are forwarded to AID/W, but neither AID/W nor the the Mission is committed to change the program.); and

e. He is informed of the necessity of return to his home country in accord with the statement signed on his bic-data form. (See paragraph III.C.2., above.)

2. Reception and Orientation in the Country of Training

a. RECEPTION

(1) *Third countries.* The participant is usually met at the airport by a USAID local employee or by a representative of the government of the country of training; and

(2) *United States.* The participant is met at the port of entry by a representative of the State Department Reception Center or one of the unpaid volunteers from the American community. This "receptionist" reviews the next few days' activity with the participant before directing him to a hotel where reservations have been made.

b. ORIENTATION TO LIFE AND CULTURE

(1) *Third Countries.* A USAID local employee or host government employee discusses the country's life, culture, and currency and gives the participant maps and other material; and

(2) *United States.* The participant spends his first week at the Washington International Center, a private organization established in 1950 to provide an introduction to the United States for official visitors. The Center also receives foreign visitors sponsored by various federal, international and private organizations, as well as A.I.D. participants. Its 3-5 day program includes lectures by American academic and professional men on such topics as government, politics, economics, religion, education, civil rights and family life in the United States with question and discussion periods following the presentation. Tours are arranged to the Capitol, the Supreme Court, the Library of Congress and places of historic interest. Nine hundred host families in the Washington area arrange through the Center to invite participants to their homes. The Center is open evenings for recreation and practice in English conversation.

c. ADMINISTRATIVE ORIENTATION

(1) *Third Countries.* A USAID American or local employee explains all the administrative and program rules governing the participant's visit; and

(2) *United States.* The participant receives a copy of the *Participant Handbook,* containing administrative and program policies that will govern his stay in the United States. He receives a combination identification-insurance card and detailed information on allowances, sickness and accident insurance, and requirements of the U.S. Immigration and Internal Revenue Services.

d. PROGRAM ORIENTATION IN THE UNITED STATES

The participant meets his A.I.D. Program Development Officer (PDO) who is himself responsible for arranging the training program; or has assigned it to a participating agency specialist. (The PDO monitors all aspects of the training of participants under his supervision.) He explains to the participant his program and itinerary, discusses possible changes if requested, and instructs the participant on the nature and frequency of the administrative and program reports as required by A.I.D. The Program Development Officer makes sure that the participant understands the program he is to undertake and assures that he has had no problem with any of the cultural or administrative orientation already received. He informs the participant, how, and under what circumstances to get in touch with him, should important questions or any emergency arise in the future.

H. SEMINARS

A.I.D. sponsors Seminars in many technical and social fields at various institutions throughout the United States. The following seminars are for participants in all fields and have the highest attendance:

1. The Vanderbilt Economic Development Program.

This is a full-year academic course in development planning, at the master's level, for graduate students working in this field. Participants usually come from the development planning bodies of their own governments. The program has been conducted for A.I.D. by Vanderbilt University, Nashville, for about ten years, and was evolved from short two-weeks seminars in economic development that were earlier held at Stanford in California, Vanderbilt and other institutions;

2. Pittsburgh Seminars.

a. *"Annual Institute on Administrative Management for Development."* The Graduate School of Public and International Affairs, University of Pittsburgh, under Dean Donald C. Stone, runs this four-month seminar in which A.I.D. has participated for several years. Its purpose is to assist countries throughout the world to raise the level of understanding and competence essential to effective governmental administrative management, and to solve the organizational, managerial, and procedural problems which impede development; and

b. *The Seminar on American Attitudes and Institutions.* A series of discussions and presentations by Pittsburgh University professors and local community specialists, it is aimed at participants in medium and higher academic levels and is intended for an international exchange of ideas as well as a clarification of American social, economic and political patterns.

3. The Seminar on Communication of Skills and Ideas.

A weekly seminar conducted for A.I.D. by the Michigan State University with the purpose of instructing A.I.D. participants in effective ways of communicating their newly acquired knowledges and skills to others, and showing them how to become more effective agents of change in their home countries. The seminar staff, directed by communications experts from Michigan State, uses team teaching and demonstrations. The seminars are held at quiet resort locations, such as Atwood Lake Lodge near New Philadelphia, Ohio.

4. The Pre-University Workshop.

A two-seek seminar held every summer in late August at the George Washington and the Georgetown Universities, Washington, D. C. The workshop's purpose is to provide intensive orientation to the American education system and campus living for participants entering U.S. colleges and universities in the fall semester. The program covers the use of the library and research facilities for writing term papers, examinations and grading, and teacher-student relations. It is restricted to those foreign nationals who have never before been in the U.S. or been exposed to the American educational system.

I. COUNSELING

The Counseling Branch of the Office of International Training was established to provide assistance in the handling of the many personal problems that may arise during the course of a technical training program. Such problems as illness, social and cultural difficulties, premature termination of training and failure by the participant to return to his home country upon completion of his training can seriously threaten or negate a training program. This centralization of counseling functions ensures immediate availability of trained, experienced staff for quick resolution, or alleviation of problems, and for uniformity of interpretations and administration of

A.I.D. regulations. It also ensures a focal point where accumulated experience and case records may indicate need for changes in A.I.D. policies and procedures.

J. EVALUATION

1. A.I.D. World-Wide Evaluation Survey of the Participant Training Program

The Agency has been conducting an evaluation survey participant training program through personal interviews with participants who have returned to their home countries, with their immediate supervisors, and with those U.S. technicians at the USAID Mission who know the participants and are familiar with their careers. Interviewing, coding and tabulation procedures have been standardized so that data from different countries are comparable and can be combined for purposes of regional and global analysis. This data may also be used locally as the basis for individual country reports.

2. Follow-Up of Returned Participants

A.I.D. believes that interest in individual trainees should not end upon their return home. If full benefit is to be derived from training abroad, it is essential that their training and professional stimulation be continued after return to regular work. Otherwise, some or all of the hoped for benefits of training abroad may never be realized.

Follow-up of returned participants is an essential and integral part of participant training. The objectives of this program are (1) to assist returned participants in developing, extending, and transmitting to others the technical and managerial knowledge acquired during their A.I.D.-financed training in the U.S. or third countires; (2) to introduce attitudes and values which are essential to social and economic development in their homeland; and (3) to broaden the participant's understanding of the U.S., its people, culture, policies and institutions.

To be effective follow-up activities are adapted to the governmental and social attitudes in the cooperating country, to the U.S. foreign aid objectives, as well as to the situation prevailing in the USAIDs. These activities consist mainly of: (1) Continuing Contacts with Returned Participants; (2) Encouragement and Extension of Membership in American Professional Societies; (3) Arrangement of Conferences, Workshops, and Seminars; (4) Supplementary Training through Correspondence Courses; (5) Organization of Technical Literature Subscription Service; (6) Creation and Support of Alumni Associations (General or Professional); (7) Publication of Newsletters and Professional Journals; (8) Presentation of Certificates of Achievement; (9) Organization of English Language Refresher Courses; (10) Publication of Participant Directories; and (11) Use of Returned Participants to Orient New Participants.

Experience has shown that the success of a follow up program depends on purposeful planning, which in turn is based on appropriate procedures. The follow-up of returnees is basically the responsibility of technical advisors attached to an A.I.D. Mission located in the returnee's country. The Training Officer plans, stimulates, and coordinates the conduct of follow-up activities in the Mission. In Missions without technicians, the follow-up lies in the hands of the Training Officer; in Missions without a Training Officer, by his equivalent who is usually the Program Officer.

In conclusion, it should be noted by users of this FY 1967 Annual Report that statistics are not currently available on all of the above-described phases of the international training program. As expansions are made in the automated management information system, however, additional information will become available for publication. Users of this publication are urged to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to: Chief, Statistical Control Branch, Administrative Division, Office of International Training, Agency for International Development, Washington, D. C. 20523.

SECTION I – FISCAL YEAR ARRIVALS
(FY 1944 through FY 1967)

Numerous requests have been received for statistics on the total AID participant training program. To help the user, data showing total participant arrivals, under non-contract and contract programs taking place in the United States and third countries of training, are included in this Section. The U.S. data are presented in area of origin summaries, and country of origin or training detail. In addition, data showing total participant arrivals by U.S. AID field of activity are included. Contents of the Section are as follows:

Non-Contract Programs[1] PAGE

Table 1. Summary of Arrivals in Major Categories of Training. 2
Table 2. Fiscal Year Summary of Non-Contract Arrivals in the U.S., by Area of Origin, FY 1944 through FY 1967 (See also, Figures 1 and 2.) 5
Table 3. Fiscal Year Non-Contract Arrivals in the U.S., by Area and Country of Origin, FY 1950 through FY 1967. 6-9
Table 4. Summary of Non-Contract Arrivals in the U.S., by Area of Origin, by U.S. AID Training Field of Activity, FY 1944 through FY 1967 (See also, Figure 3.). 11

Contract Programs[2]

Table 5. Fiscal Year Summary of Contract Arrivals in the U.S. by Area of Origin, FY 1955 through FY 1967 (See also, Figure 4.) 13
Table 6. Fiscal Year Contract Arrivals in the U.S., by Area and Country of Origin, FY 1955 through FY 1967. 14-15

Third Country Programs[3]

Table 7. Fiscal Year Summary of Exclusive Third Country Arrivals by Area of Training, FY 1955 through FY 1967 (See also, Figure 5.). 16
Table 8. Fiscal Year Exclusive Third Country Arrivals, by Area and Country of Training, FY 1955 through FY 1967. 17-18

With reference to Table 3, "country of origin" statistics are not available for years prior to 1950, and the user is referred to tables showing information by area of origin for figures on FY 1944 through FY 1949 participant arrivals.

Training programs under contractual agreements and in third countries were instituted in fiscal year 1955.

[1] For background information on non-contract programs, see INTRODUCTION, paragraph III.A. – F.

[2] Contract programs are those for which the U.S. funds a "university-to-university" contract between an American university and a host country institution stating the kinds of services to be performed by the American university. These include advisory services on those aspects of the host country institution to be improved, including curriculum revision, etc. The teachers in the host country institution may be sent to its sister institution in the U.S. under the university contract agreement. Contracts are also entered into by AID with technically qualified firms, associations, and individuals for the purpose of employing their services were appropriate.

[3] For background information on third country programs, see INTRODUCTION, paragraph III.F.3.

FISCAL YEAR ARRIVALS
(1944 through 1967)

Table 1. SUMMARY OF ARRIVALS IN MAJOR CATEGORIES OF TRAINING [1]

(U.S. Non-Contract and Contract arrivals are reported by area of origin. Exclusive third country arrivals are reported by area of training.)

CATEGORY	TOTAL	AREAS						COUNTRIES OF TRAINING NOT IDENTIFIED
		EAST ASIA	VIET-NAM (South), Rep. of	LATIN AMERICA	NEAR EAST AND SOUTH ASIA	AFRICA	EUROPE	
GRAND TOTAL	*124,103*	27,638 (22.3%)	2,225 (1.8%)	32,882 (26.5%)	25,179 (20.3%)	10,569 (8.5%)	25,166 (20.3%)	444
U.S. Non-Contract (FY-44 thru FY-67)....	94,017 (75.8%)	17,869	2,058	27,741	15,635	8,589	22,125	
U.S. Contract (FY-55 thru FY-67)....	7,133 (5.7%)	1,388	97	1,897	2,148	1,597	6	
Exclusive Third Country (FY-55 thru FY-67)....	22,509[2] (18.1%) 444[3]	8,381	70	3,244	7,396	383	3,035	444

[1] Data includes participants trained in the United States, off-shore U.S. (Puerto Rico, Canada, Bermuda, Hawaii, and Okinawa), and in exclusive third countries of training in programs under direct AID-sponsorship, or indirectly through university-to-university and other AID-funded contracts. Data excludes persons trained by local training, invitational travel, correspondence courses, etc. For explanation of categories, see Introduction.

[2] Excludes participants trained in both the United States and third countries (combination training). Some programs are implemented in two or more third countries; therefore, the number of arrivals for training exceeds the number of individuals trained.

[3] Country of training not identified in source reports.

Source: Reports published by AID (and its predecessor agencies) during 1958 through 1967; and data available in unpublished reports for years prior to 1958. See Introduction for further explanation of source of data.

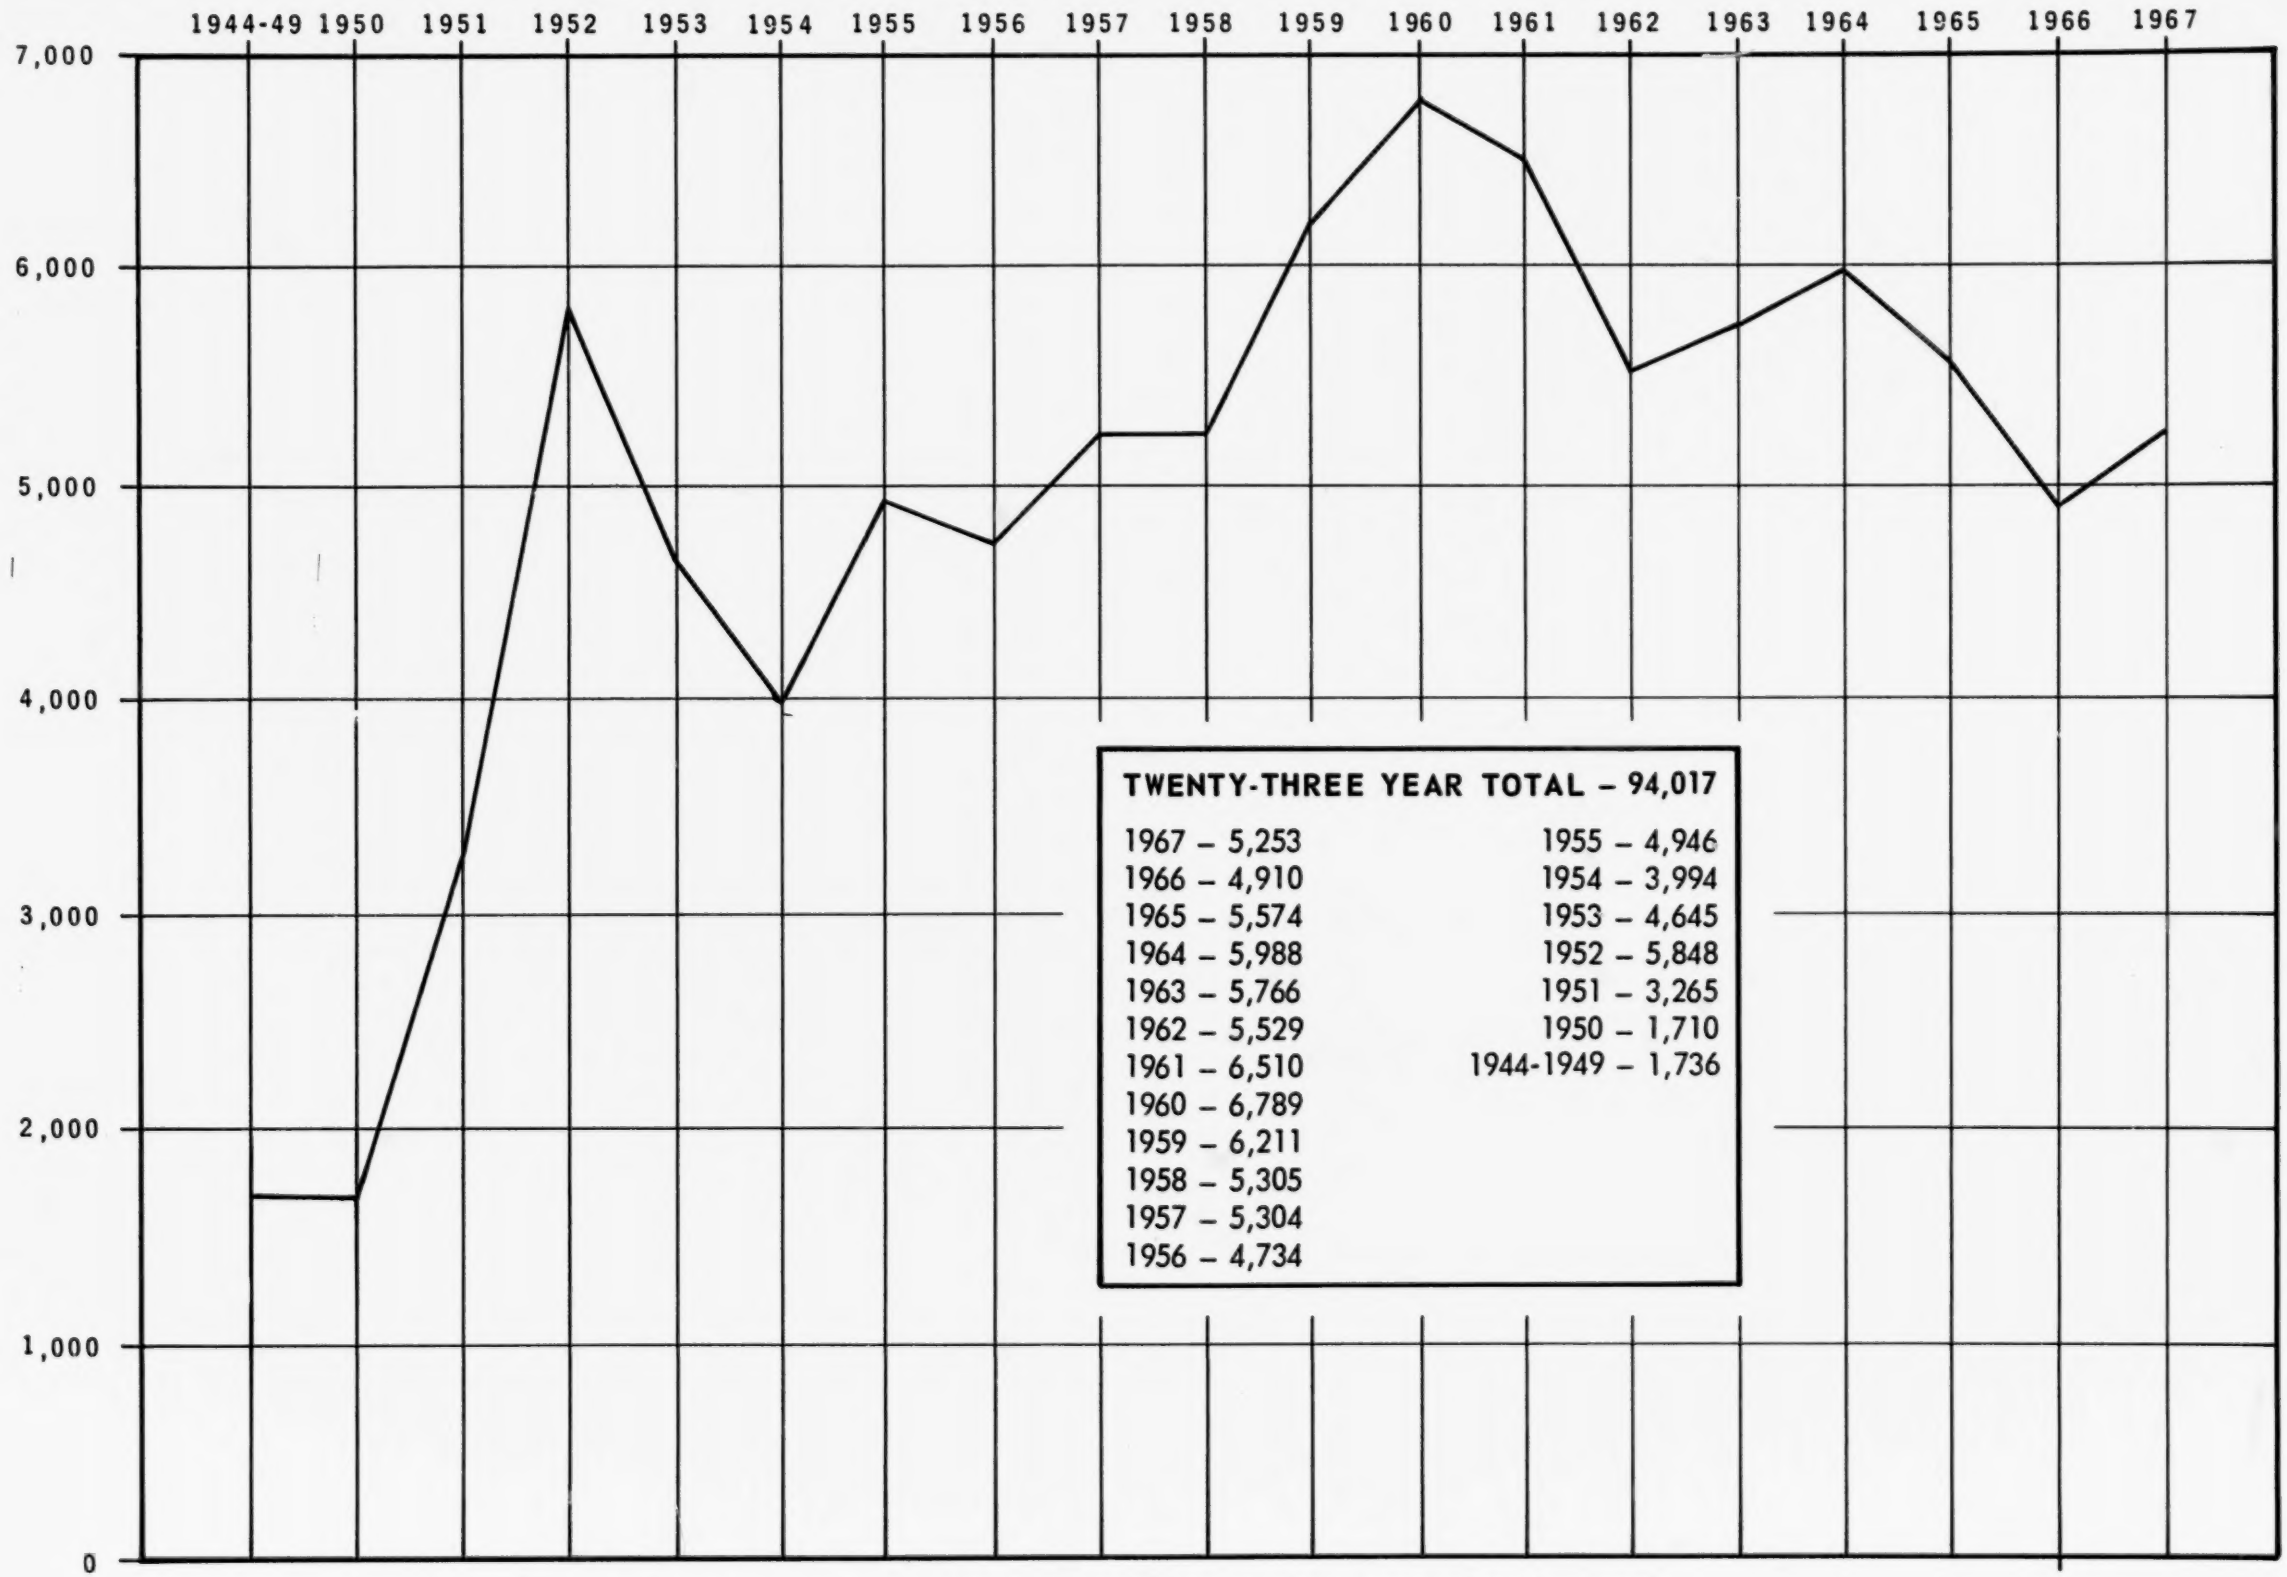

*Figure 1. Non-Contract Arrivals in the U.S. by Fiscal Year * (1944 – 1967)*

* Data includes all A.I.D. sponsored non-contract participants arriving in the U.S. and Off-shore U.S.

[1] Data includes AID-sponsored non-contract participants arriving in the U.S. and off-shore U.S. Information by country for FY 1949 and prior years, not available. (See Table 2, by area of origin, for figures prior to FY 1950).

[2] Includes Congo (Brazzaville) and Congo (Kinshasa).
[3] DOTS – Dependent Overseas Territories of European Countries.
[4] Includes Egypt and Syria.

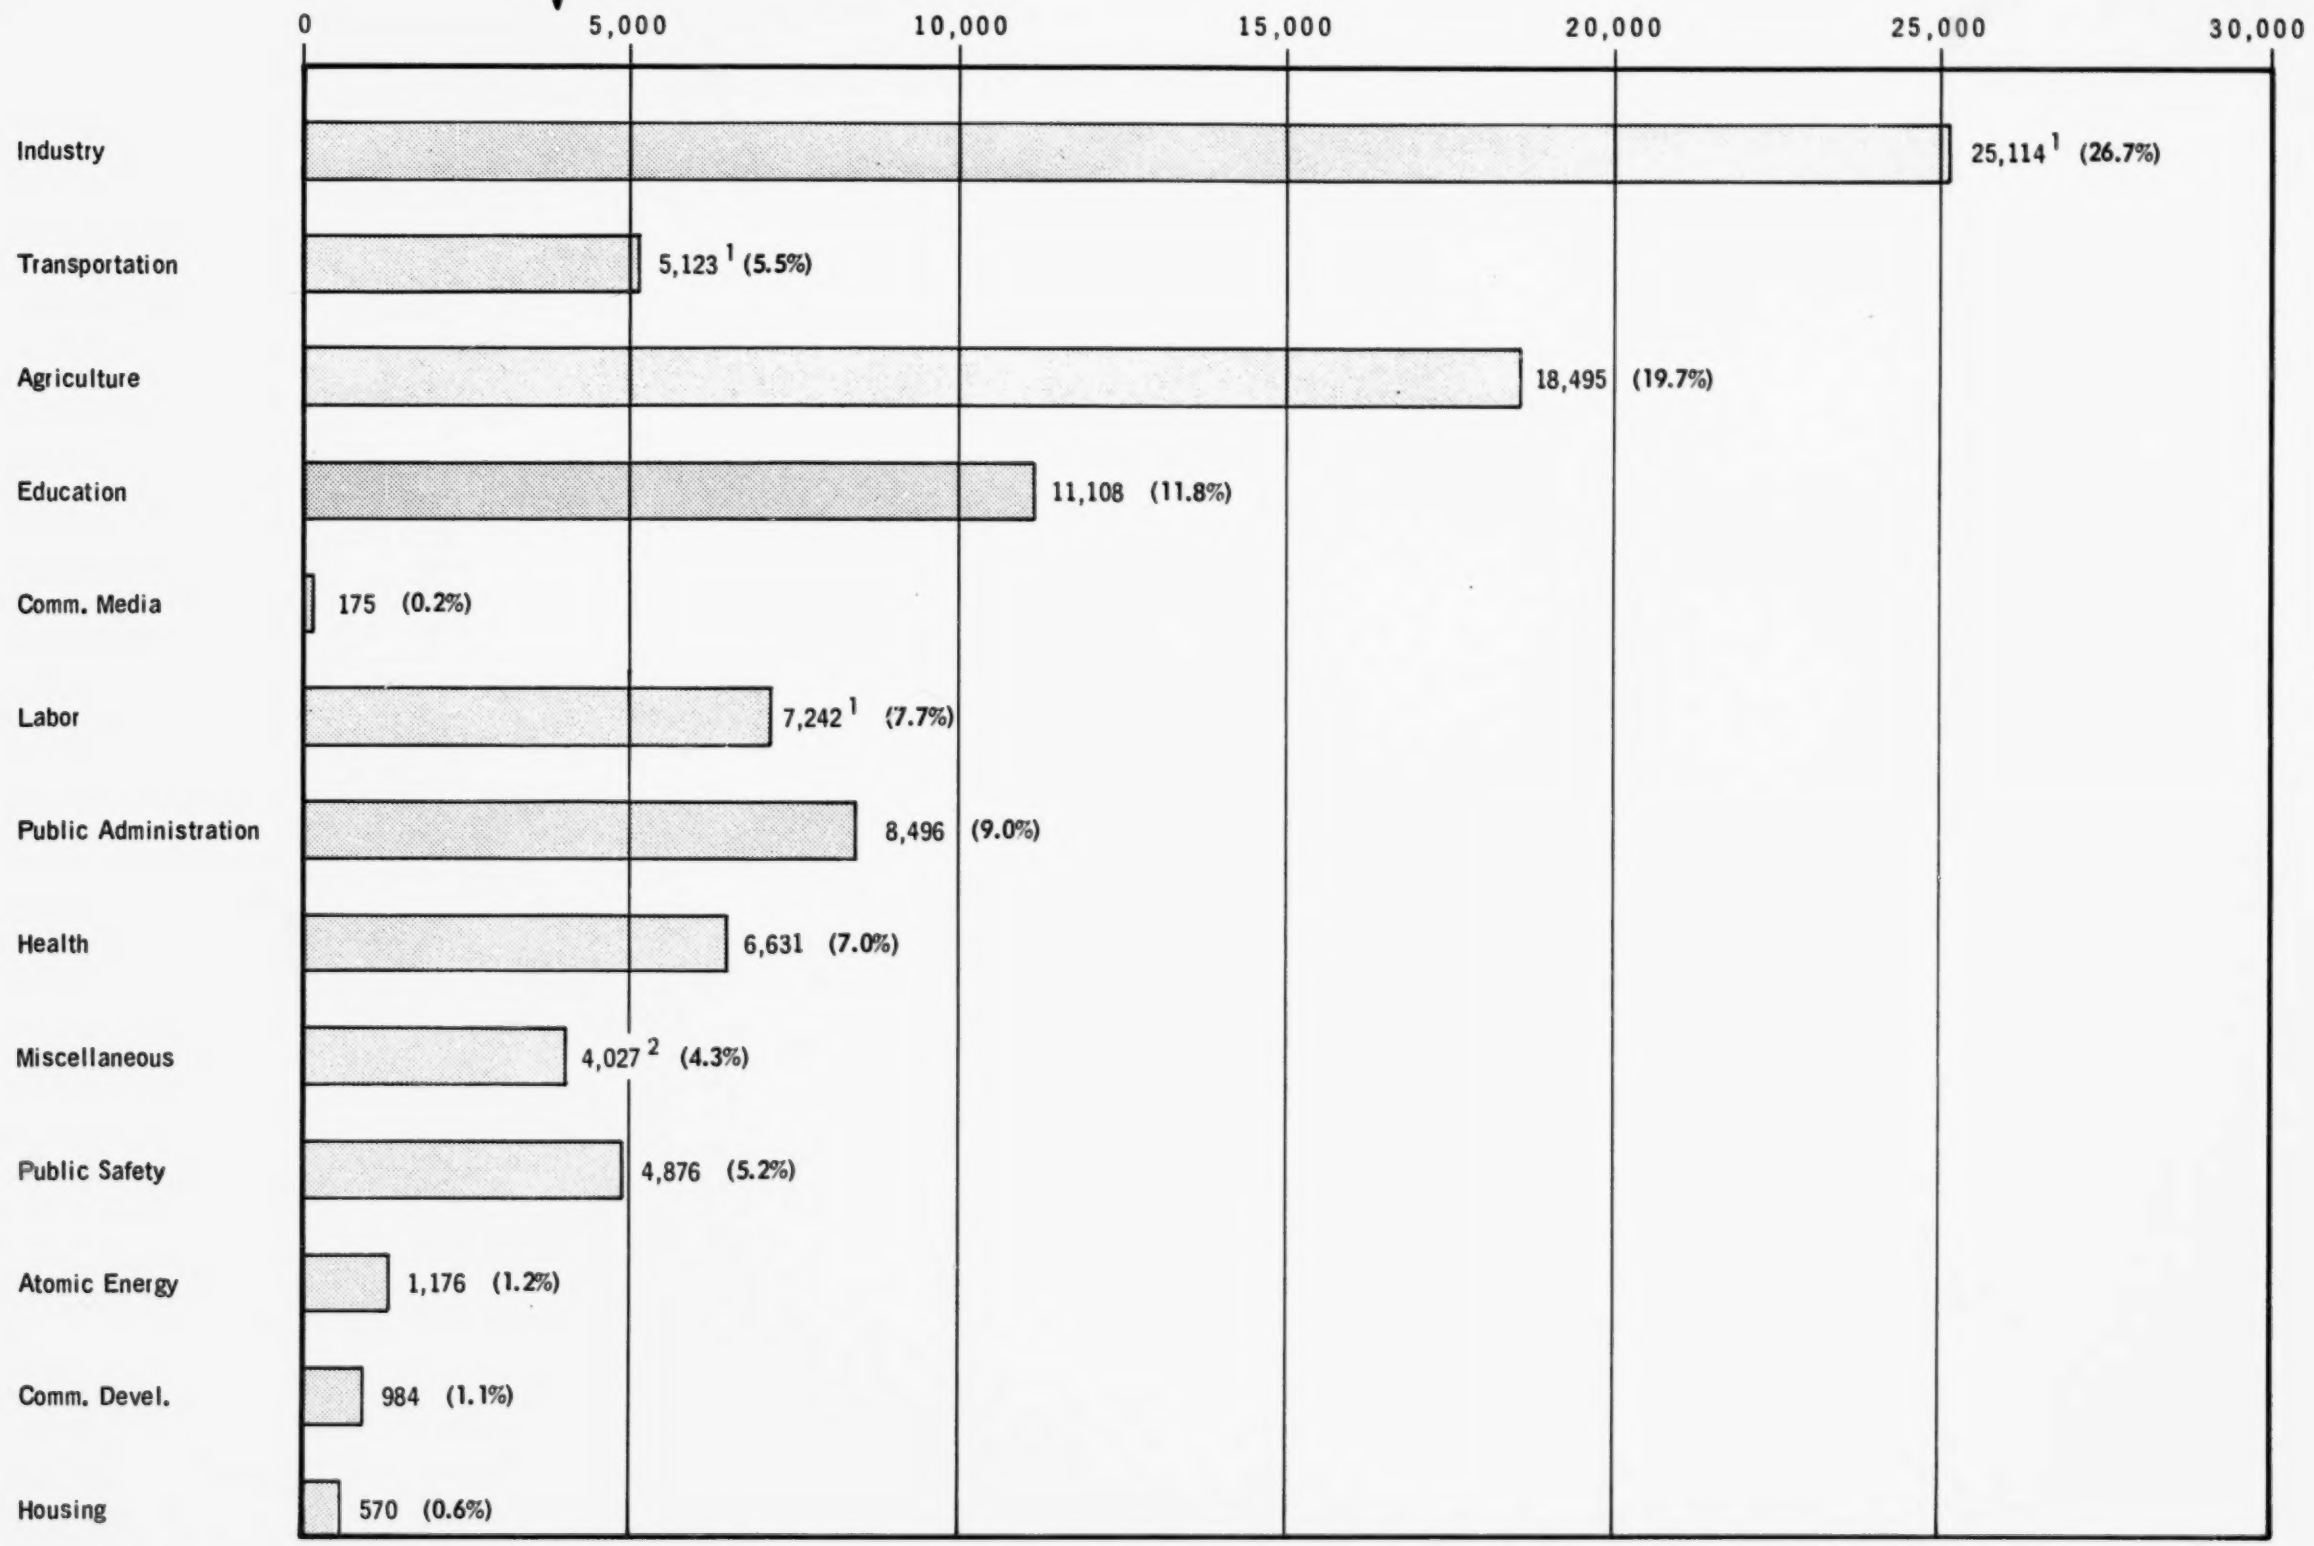

*Figure 3. Cumulative Non-Contract Arrivals in the U.S. by Field of Activity * (Fiscal Years 1944 - 1967)*

[1] Prior to FY 1955, industry, transportation, and labor were combined in a total of 13,949 participants.

[2] Includes 136 participant arrivals during FY 1944 through FY 1955 for which no distribution by field is available, and included under "Miscellaneous" in this chart.

* Data includes all A.I.D. sponsored non-contract participants arriving in the U.S. and off-shore U.S.

Figure 5. Exclusive Third Country Arrivals [3] by Fiscal Year (1955-1967)

[1] Excludes participants in third countries for less than 4 weeks.

[2] Country of training not identified in source reports. Arrivals occurred during FY-59 through FY-61.

[3] Excludes arrivals in both the United States and third countries (combination training). Some programs are implemented in two or more third countries; therefore, the number of arrivals for training exceeds the number of individuals trained.

MULTI-COUNTRY	444 [2]					112	127	205						

[1] Excludes participants in third countries for less than 4 weeks.

[2] Country of training not identified for 444 participants in source reports.

[3] Lebanese participants at American University/Beirut are included in the figures. Since this training is conducted at an American-sponsored facility, the training is considered non-local.

SECTION II. FY 67 ARRIVAL STATISTICS

Effective with Fiscal Year 1967 statistics, the AID automated management information system was expanded to include a more detailed description of the participant training program; therefore, the reports contained in this Section are more statistically illustrative of participant arrivals than those reports published in prior years. Tables have been added which indicate numbers of new participants training in non-academic programs (on-the-job, observation, seminar, or mixed), and academic programs (including organized occupational study) with an indication of level of training, degree objective, if any, and arranged duration in man-months. The report on vital statistics has been expanded to include sex and marital status of participants. Inquiries have been received regarding number of participants training in individual, group, or combination programs and this information is now available to the user in Table 17. Other data in this Section is similar to that published in prior years.

Definitions used in developing statistical base:

Academic Training – enrollment for twelve weeks or more in a regular course at an institution which grants an academic degree or diploma, whether or not a degree is the participant's objective.

Casual training – where an AID participant "drops in" for a short visit to a government agency or has a brief program at an agency of less than one week duration.

Combination program – where both group and individual training is developed for a participant.

Group program – a pre-arranged program for a number of participants, or a special program developed for a team.

Individual program – a program developed for a single individual. (All academic programs are considered in this category.)

Mixed programs – where the total training experience is split equally between two or more types, i.e., on-the-job, observation, seminar, etc.

Non-academic program – training through seminars, on-the-job, and observation tours.

Organized occupational study (O.O.S.) – enrollment for twelve weeks or more in a program based on a formal organized curriculum in a given occupational category. The training may result in an award of a certificate or diploma, but would not count as course credit toward an academic degree, e.g., FAA, FBI, International Police Academy, and "Special Courses" arranged by a university for foreign nationals.

Preparatory Training – regular course work at the pre-college level, taken in preparation for enrollment in college level undergraduate study.

Primary programming agency – an agency which has primary programming responsibility for developing and implementing the substantive portion of the participant's entire program.

Secondary programming–where an agency receives from a primary programming agency (either the Office of International Training/AID, another bureau, or another agency) responsibility for developing and implementing a portion of the participant's entire program. The period of training must be of one week or more in duration.

Seminar training – where the duration is less than 3 months, the program is considered "non-academic"; where the duration is 3 months or more, the program is defined as "organized occupational study."

Total		5,253

[1] Seminar program less than 3 months duration.

[2] Organized occupational study is statistically defined as enrollment for 12 weeks or more in a program based on a formal organized curriculum in a given occupational category. The training may result in an award of a certificate or diploma but would not count as course credit toward an academic degree, e.g., FAA, FBI, International Police Academy and special courses arranged by a university for foreign nationals.

[3] Academic training is statistically defined as enrollment for 12 weeks or more in a regular course at an institution which grants an academic degree or diploma, whether or not a degree is the participant's objective.

[1] Secondary programming is where an agency receives from a primary agency (either A/IT, or another bureau of another agency) responsibility for developing and implementing a portion of the participant's entire program (this period must be of more than one week duration).

[2] For report on primary programming, see Table 17.

[3] Two days not included in cumulative man-week total.

NOTE: If totals reported exceed the actual number of participants programmed by the Department, this means that participants were programmed by more than one Bureau of a Department and were counted for each Bureau.

SECTION III – FY-67 IN-TRAINING STATISTICS[1]

This new section is a compilation of participants in training during the fiscal year and includes those on board as of July 1, 1966, and new arrivals during the year.

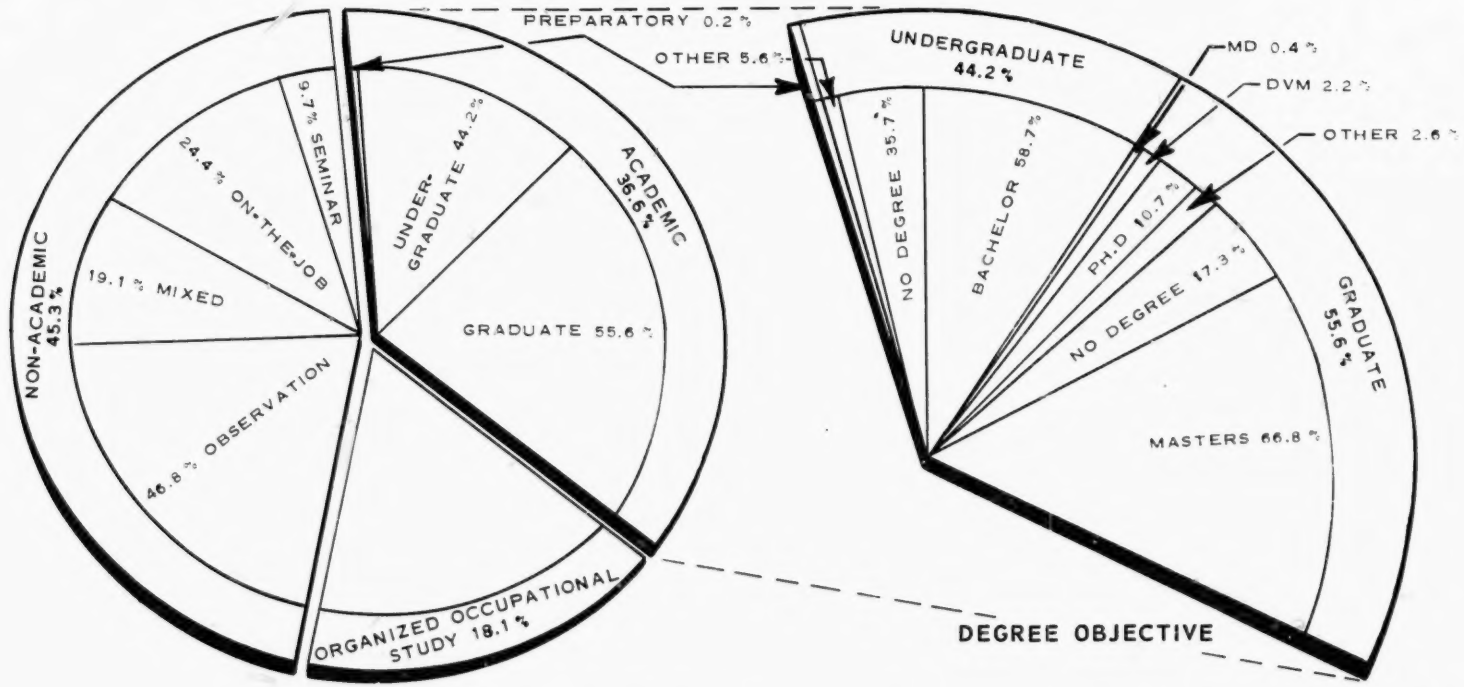
Contents of the Section are as follows:

Page

Table 27. Summary of Non-Contract Participants in Training in the U.S., by Area of Origin, by Type and Level of Training 52
(See also, Figure 7)

Table 28. Non-Contract Participants in Training in the U.S. by Area and Country of Origin, by Type and Level of Training 53-54

[1] For statistical definitions of types of training, see Section II, page 19.



Non-academic	**3,998**
On-the-job	978
Observation	1,872
Seminar [1]	386
Mixed	762
Organized occupational study [2]	**1,601**
Academic [3]	**3,232**
Preparatory	7
Undergraduate	1,428
Graduate	1,797
Total	**8,831**

[1] Seminar programs less than 3 months duration.

[2] Organized occupational study is statistically defined as enrollment for 12 weeks or more in a program based on a formal organized curriculum in a given occupational category. The training may result in award of a certificate or diploma, but would not count as course credit toward an academic degree; e.g., FAA, FBI, International Police Academy and "special courses" arranged by a university for foreign nationals.

[3] Academic training is statistically defined as enrollment for 12 weeks or more in a regular course at an institution which grants an academic degree or diploma, whether or not a degree is the participant's objective.

SECTION IV – FY-67 DEPARTURE STATISTICS

The information in this Section describes some aspects of completed non-contract programs. The tables showing departures by training field of activity, and by type and level of training are similar in format to tables showing the same data for arrival and in-training participants permitting comparison of the three phases of participant training. Length of training statistics have been added due to the many inquiries received for such information.

Contents of the Section are as follows:

		Page

Total	**5,407**

[1] Seminar programs less than 3 months duration.

[2] Organized occupational study is statistically defined as enrollment for 12 weeks or more in a program based on a formal organized curriculum in a given occupational category. The training may result in award of a certificate or diploma, but would not count as course credit toward an academic degree; e.g., FAA, FBI, International Police Academy and "special courses" arranged by a university for foreign nationals.

[3] Academic training is statistically defined as enrollment for 12 weeks or more in a regular course at an institution which grants an academic degree or diploma, whether or not a degree is the participant's objective.

SECTION V – AID FOLLOW-UP PROGRAM

The Policy Planning and Evaluation Staff has provided the tables for this Section. The data are limited to those missions having an active follow-up program; and, therefore, the information contained herein should not necessarily correspond with figures published in other sections of this publication. For background information on the AID Follow-up Program, see INTRODUCTION, paragraph III.J.

Contents of the Section are as follows:

Table 33. AID Follow-Up Program – Summary for FY-67 66-67

Table 34. World-Wide Returned Participant Training Utilization 68

Table 35. Summary of Statistical Data on Participants Handled by U.S. AID's in FY-67 69

[1] Figure from FY-66 U-418 report; no report received in FY-67.

[2] Does not include Taiwan (2,520) through FY-65, because the mission phased out. These participants would bring the total for EA regional to 18,766. The position under Taiwan now occupied by Malcolm G. Cook, R-3, will be established as a training position after his tour is finished.

[3] Does not include Egypt, Syria, and Yemen, which broke diplomatic relations with the U.S. in May and June, 1967. No reports have been received since that time. Respective cumulative totals for those countries through FY-66 are 793, 141, and 133. Iran, with a cumulative total through FY-67 of 1,693, has not been included, because the mission phased out 11/30/67. If these participants from Egypt, Syria, Yemen, and Iran are added to the cumulative total for NESA region from active programs, the total becomes 16,716. Mr. Arthur J. Mekeel, R-3, is NESA Regional training officer in Beirut and handles third country training at AUB.

[4] Does not include Mexico because the mission phased out. Mr. David Amato, R-2, is development and training officer in Mexico City. The 1,208 cumulative total through FY-66 would bring the LA regional total to 28,904.

[5] Does not include Sudan, which broke diplomatic relations with the U.S. in June, 1967. No reports have been received since that time. If the 724 participants who have returned to Sudan through FY-66 are included in the AFR total, the cumulative total for the region would be 8,190.

[6] The African American Institute is contracted with to handle some aspects of training in RUA.

[7] The RUA Training Officer calls on AFR/ID for technical assistance.

14 AAI liaison officers are responsible for selecting, orienting, and conducting follow-up of returned participants.

SECTION VI — COUNTRY DATA

This Section has been added to aid the user who is interested in data pertaining to a specific country and includes, along with information contained in the previous tables of other Sections, additional figures showing arrivals by fiscal year of funding, arrival orientation and pre-program training, post-program training and services, vital statistics, and fiscal year obligations. Compilation of these data is shown for each country participating in any of the major categories and phases of training during FY-67. For example, although Mozambique had no arrival or departure actions, one participant, under contract, was in training during the fiscal year and therefore this country is included in this Section; just as a country with greater participant activity (e.g., Colombia) is a part of this Section. For data on those countries having no training activity during FY-67 the user is referred to the pertinent tabular Section.
